

Helping Lenders Navigate a Sea of Change

**Is your organization, today, trying to do more with less staff?
Have you placed important in-house technology projects on hold?
Are you struggling to stay ahead of your competition?**

In order to be competitive in today's changing marketplace, it is critical that you look at the new technologies and services available. Backed by the power and stability of LPS, Empower delivers:

- Loan origination technology, in a true service-oriented architecture (SOA), that provides the efficiency gains you need to perform optimally with a reduced staff.
- The most up-to-date features and tools to maintain compliance.
- A strategy that enables you to integrate the latest in critical Web functionality while leveraging your existing technology investments.
- Access to a multitude of integrated products and services from LPS that automate the lending process from point-of-sale through servicing.

Empower for .Net is an enterprisewide loan origination system (LOS) that addresses every facet of the loan process, from lead generation through funding and post-closing.

Let LPS Empower Light the Way

See firsthand how LPS Empower can help you "navigate this sea of change." Call or e-mail today to arrange your own one-on-one session to discuss LPS' exciting new products and services.
